  "destination":global.get('d'),
  "Seat":global.get('s')
}
return msg;
```

FORM DETAILS:

The screenshot displays the Node-RED web interface. On the left, the 'Edit form node' panel is open, showing the configuration for a form node. The 'Properties' section includes a 'Group' dropdown set to '[Booking trains] Choose train', a 'Size' dropdown set to 'auto', and a 'Label' text field containing 'optional label'. Below these, the 'Form elements' section contains a table with three rows of form elements:

Label	Name	Type	Required	UiRows	Remove
Name	name	Text	<input checked="" type="checkbox"/>		
Age	age	Number	<input checked="" type="checkbox"/>		
Mobile num	num	Number	<input checked="" type="checkbox"/>		

At the bottom of the form node configuration, there is an 'Enabled' checkbox which is currently checked.

On the right side of the interface, the 'debug' console is open, showing a list of messages. The messages are JSON objects containing train data, such as:

```
{ name: "Train1", lat: 13.08363, lon: 80.2708 }
```

```
{ name: "Train2", lat: 12.40797, lon: 79.8141 }
```

```
{ name: "Train1", lat: 11.83331, lon: 79.37465 }
```

```
{ name: "Train1", lat: 11.59664, lon: 78.69899 }
```

```
{ name: "Train1", lat: 11.63431, lon: 78.11122 }
```
